EXTRAORDINARY TECHNOLOGY FOR BUSINESS

“I used to think that cyberspace was fifty years away. What I thought was only fifty years away was only ten years away. And what I thought was ten years away was actually here. I just wasn't aware of it”

Bruce Sterling, Co-founder of Microsoft

The next generation of bookkeeping will be web-based.

Using **Glazers Online**, your business can benefit today from a true Application Service Provider (ASP) and enjoy the business savings and pro-active approach of web-based accounting.

Many of our business clients agree that:

- They enjoy running their business but they are not accountants
- Manual bookkeeping takes so much time
- Computerised accounting systems never seem to provide the right information quickly
- They want to employ a management accountant but can't afford to pay the salary

The solution to these problems is provided by **Glazers Online**.

Using our web site all you have to do is enter your basic sales and purchase information on-line through our secure WebLink service. This service is available 24 hours a day, 7 days a week and we'll do the rest.

This means you don't need to keep a computerised accounting system on-site, your accounting data is automatically transferred to us, we check the entries for you and produce instant management information which is supplied back to you via our secure communication system - as often as you need it to run your business efficiently.

Furthermore at the end of the year, your year-end accounts are produced more easily as we already have most of the correct information.

“The companies still standing in the midst of the Internet tidal wave will be those that synthesise the old and the new economies”

Business Today

The benefits to your business are many.

Cost savings

You don't need to purchase or continue to upgrade your accounting software. **Glazers Online** eliminates the need for any on-site software.

Data Back-up and Security

There is no need to back-up any accounting data, our secure server takes care of that for you in a centrally managed and protected environment.

24/7 Service

Access to the service and accounting information and reports are available 24 hours a day, 7 days a week, 365 days a year. The Internet never sleeps.

Data Integrity

Your management accounting team at **Glazers Online** will always check your accounting data for posting errors when you submit the information through WebLink. This means your data is always correct and management information is up to the minute.

Fixed Fees

Your business can benefit from a guaranteed fixed fee service. We do not issue any unexpected accountancy bills and you can budget for your own accounting fees to suit your business.
