

Bath Academy was established in 1994, and is a friendly international college for British and overseas students. With an average of 36 employees, the college has a history of excellent academic success, and is one of the leading independent colleges in the region. Specialising in pre-university and foundation courses, the college offers first class teaching staff, excellent accommodation and a wide variety of courses, ranging from business to religious studies.

As a related company of a larger organisation, Bath Academy were introduced to **Glazers** who were already working with other divisions within the group. The company Chairman has dealt with the accounting firm for many years, and was keen to install the practice into Bath Academy for that reason.

Glazers have worked with Bath Academy for the past four years, and organise all the college's accounts, company returns and corporation tax returns. The Glazers team also gets involved in most financial matters on a regular basis. Rob Brown, financial director of Bath Academy, is happy with the service that the firm provides, commenting, "**Glazers** prepare all of the organisation's accounts, and each company is happy with the service that they provide. The staff are friendly and approachable, and if we have any problems they are always happy to help, which is why I would recommend them to others".
